Mealtime therapy matters inside the body. But it first needs to fit your patient’s life.

Achieving mealtime control takes more than insulin alone. That’s why the Humalog® 3-Part Approach provides a combination of products, pens, and tools designed to help fit mealtime insulin into your patient’s life. To find out more, visit www.humalog.com.

For additional safety profile and other important prescribing considerations, see the accompanying Brief Summary of full Prescribing Information.

Humanly possible.

Insulin Isopro injection (rDNA origin)
